

## Saying 'stay out' forever

Scientists at the Waste Isolation Pilot Plant, one of the nation's repositories for long-lasting waste from nuclear weapons production, are preparing a warning system designed to be legible and understandable for 500 generations.

BACK TO PREVIOUS INFORMATION

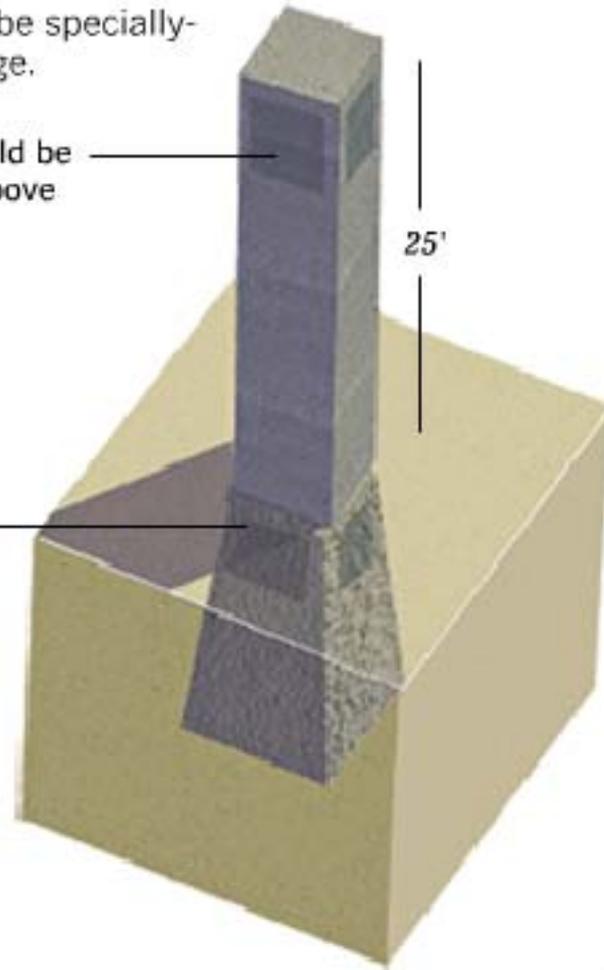

### **A** Monoliths

Stone monoliths would be specially-designed to deter salvage.

Warning messages would be engraved on plaques above and underground.

Plaque

Monoliths would be submerged 17' into earth to ensure permanency.

### ers, one goal

and be built from a range of media to counter likely future visitors.
