

**US Department of Energy Waste Isolation Pilot Plant
New Mexico Statute 24-16 Sections 1-4
Compliance Policy
DOE/WIPP-11-3480 Revision 0
September 2011**

The U.S. Department of Energy Carlsbad Field Office and Washington TRU Solutions LLC, in compliance with New Mexico Statute 24-16 Sections 1 through 4, also known as the Dee Johnson Clean Indoor Air Act, maintain a strict “No Smoking” policy for the Skeen-Whitlock Building and the Waste Isolation Pilot Plant (WIPP) facility. Users of smokeless tobacco products must also observe basic rules of use to facilitate safety and sanitation. To ensure this program is observed by all personnel, the following requirements are published and will remain in force until the statute is revoked or revised.

1. Smoking of tobacco products is prohibited in all interior spaces and within 25 feet of doorways, windows, and ventilation systems.
2. Signs are posted in and around building entrance doorways that read “No Smoking” so persons will know that these areas are designated smoke free.
3. Designated smoking areas have been established outdoors at the Skeen-Whitlock Building and at the WIPP facility. Smoking is allowed *only* in these designated locations.
4. Anyone lighting a cigarette, cigar, or pipe should wait to do so until they reach a designated smoking area.
5. Users of smokeless tobacco are not permitted to spit on walkways or other areas where foot traffic normally occurs.
6. Smokeless tobacco receptacles, such as soft drink bottles or cans, shall not be left on tables or on the ground. They must be covered securely to contain the contents, and placed in trash bins.
7. Used tobacco products must be properly disposed of in the fire-resistant receptacles provided.
8. Smokeless tobacco shall not be disposed of in drinking fountains or common area sinks.

**Please be considerate of others, and an environmentally responsible neighbor
to all WIPP personnel.**
