For Immediate Release

Westinghouse Names John S. Angelis Manager of Information Resource Management

CARLSBAD, N.M., March 22, 2000 – The Westinghouse Waste Isolation Division (WID) has named John S. Angelis of Carlsbad as Manager of Information Resource Management at the Waste Isolation Pilot Plant (WIPP).

“John’s extensive computer technology and telecommunications experience, combined with his progressive attitude, make him an ideal choice for this increasingly important position,” said WID General Manager Joe Epstein.

Westinghouse is the management and operating contractor for the U.S. Department of Energy’s Carlsbad Area Office at WIPP.

Information Resource Management is responsible for a broad range of services that include desktop computer repair and upgrades; cellular telephones, pagers, voice mail, Intranet and Internet access; computer applications development; video and teleconferencing support; and WIPP computer security.

As manager, Angelis oversees the overall acquisition, development, installation and control of automated data processing and hardware and software resources at WIPP.

Prior to his recent promotion, Angelis was team leader for Information Resource Management. He joined Westinghouse in 1984 as a computer operations technician.

Angelis is a graduate of the School of Computer Technology in Pittsburgh, PA. He earned a bachelor's degree in business management from the College of the Southwest in Hobbs.

He and his wife Sherri, who is employed by the Carlsbad AWARE Program, have a son, Johnny, a student at P. R. Leyva Junior High.
