Attachment B, Proposed Revised Permit Text	B-1

Overview of the Permit Modification Request

This document contains a Class 3 Permit Modification Request (**PMR**) for the Waste Isolation Pilot Plant (**WIPP**) Hazardous Waste Facility Permit (**HWFP**), Number NM4890139088-TSDF, hereinafter referred to as the WIPP HWFP. This PMR is a result of a determination by the New Mexico Environment Department (NMED) on April 20, 2007 which stated that no further action is necessary for Solid Waste Management Units (**SWMUs**) and Areas Of Concern (**AOCs**) listed in the WIPP HWFP. Because no further action is needed, the permit must be modified to accurately reflect this status. The HWFP directs that such changes be accomplished through the Class 3 Permit Modification process found in 20.4.1.900 New Mexico Administrative Code (**NMAC**) (incorporating Title 40, Code of Federal Regulations (**CFR**) 270.42(c)).

This PMR is being submitted by the U.S. Department of Energy (**DOE**), Carlsbad Field Office (**CBFO**) and Washington TRU Solutions LLC (**WTS**), collectively referred to as the Permittees, in accordance with the WIPP HWFP, Condition VII.P.1 (20.4.1.900 NMAC incorporating CFR §270.42(c)). The modification proposes to:

- delete Tables 2 and 3 from Module VII of the HWFP and
- add Table 4 in Module VII of the HWFP.

The proposed changes are based on direction from the NMED to request No Further Action for these SWMUs and AOCs. This action will not reduce the ability of the Permittees to provide continued protection to human health and the environment.

The requested modifications to the WIPP HWFP and related supporting documents are provided in this PMR. The proposed modifications to the text of the WIPP HWFP have been identified using a double underline, and a ~~strikeout~~ font for deleted information. All direct quotations are indicated by italicized text. The following information specifically addresses how compliance has been achieved with the 20.4.1.900 NMAC requirements for submission of this Class 3 PMR.

Current Regulatory Status

According to Permit Condition VII.A, an “Area of Concern” means any discernible unit or area which, in the opinion of the Secretary, may have received solid or hazardous waste or waste containing hazardous constituents at any time. The Secretary may require investigation of the AOC to determine if it is a SWMU. If shown to be a SWMU by the investigation, the AOC shall be reported by the Permittees as a newly-identified SWMU. If the AOC is shown not to be a SWMU by the investigation, the Secretary may determine that no further action is necessary and notify the Permittees in writing.”

The HWFP defines a SWMU as follows, “*“Solid Waste Management Unit” means any discernible unit at which solid wastes have been placed at any time, irrespective of whether the unit was intended for the management of solid or hazardous waste. Such units include any area at a facility at which solid wastes have been routinely and systematically released. The definition includes regulated units (i.e., landfills, surface impoundments, waste piles and land treatment units) but does not include passive leakage or one-time spills from production areas and units in which wastes have not been managed (e.g., product storage areas).”*

The Permittees submitted a *No Further Action Petition for Solid Waste Management Units and Areas of Concern* to the NMED in September 2002.

At the request of the NMED, the Permittees submitted sampling data collected on AOCs in April 2006 and submitted sampling data on SWMU 001g collected in January 2007.

Based upon these submittals the NMED approved the Permittees No Further Action Petition for Solid Waste Management Units and Areas of Concern on April 20, 2007, and directed the Permittees to initiate this Class 3 PMR.

1. **20.4.1.900 NMAC (incorporating 40 CFR §270.42(c)(1)(i)) requires the applicant to describe the exact change to be made to the permit conditions and supporting documents referenced by the permit.**

This PMR is being submitted to request the following changes to Module VII of the WIPP HWFP entitled *Corrective Action For Solid Waste Management Units*:

1. Delete Table 2 entitled *SWMUs Requiring An RFI*.
2. Delete Table 3 entitled *AOCs Included in the Permit*.
3. Add Table 4 entitled *SWMUs/AOCs Requiring No Further Action*.

The exact changes to permit conditions and supporting documents are included in Attachment B.

2. **20.4.1.900 NMAC (incorporating 40 CFR §270.42(c)(1)(ii)) requires the applicant to identify that the modification is a Class 3 modification.**

The proposed modification is classified as a Class 3 permit modification in accordance with Permit Condition VII.P.1.

3. **20.4.1.900 NMAC (incorporating 40 CFR §270.42(c)(1)(iii)) requires the applicant to explain why the modification is needed.**

Overview

NMED issued Module VII (*Corrective Action for Solid Waste Managements Units*) as part of the WIPP Permit on October 27, 1999. Module VII required investigation of 23 sites referred to as SWMUs and AOCs in the HWFP and listed in Tables 2 and 3 of Module VII of the HWFP. The Permittees submitted the *WIPP No Further Action Petition for Solid Waste Management Units and Areas of Concern* in September 2002 and collected additional data in April 2006 and January 2007. Based upon those submittals the NMED issued an approval of the petition on April 20, 2007.

No Further Action (NFA) Criteria

During investigation of SWMUs and AOCs at WIPP, it was determined that some sites identified as SWMUs or AOCs never managed (generated, treated, stored, or disposed of) Resource Conservation and Recovery Act (**RCRA**) solid or hazardous wastes and/or constituents or other Comprehensive Environmental Response, Compensation and Liability Act of 1980 (**CERCLA**) hazardous substances. Additionally, some SWMUs and AOCs never had a release to the environment, and future releases were determined to be unlikely. Finally, some SWMUs and AOCs were characterized and/or remediated in accordance with current applicable state and/or federal regulations, and confirmatory sampling data indicate that the remaining contaminant concentrations do not pose unacceptable levels of risk to human health or the environment under current and projected future land uses.

The criteria established by the NMED (*Technical Support Document, Exclusion/inclusion of Solid Waste Management Units and Areas of Concern, Table 4, October 27, 1999*) to qualify a SWMU or AOC for NFA are defined below:

1. The site does not exist. If it can be shown that the site does not exist, then a proposal may be made for NFA.
2. The site was not used for the management of hazardous constituents. If this can be shown, then a proposal may be made for NFA.
3. There was no release of hazardous constituents to the environment. If it can be shown that there was not, nor is there likely to be a release, then a proposal may be made for NFA.
4. There was a release, but a release assessment indicates that the concentrations of hazardous constituents are at acceptably low levels as determined by regulators. The release assessment includes site characterization, release assessment sampling, and risk assessment.
5. There was a release, but the site was characterized and/or remediated under another authority, such as the New Mexico Underground Storage Tank Bureau, and, documentation such as closure letter is available, then the site may be proposed for NFA. Regulation of a site by another authority is not, necessarily, sufficient justification for a proposal for NFA.
6. There was a release, but the site has been remediated. Typically, the site would have been remediated by means of Voluntary Corrective Actions or Expedited Cleanups/ Voluntary Corrective Measures. After remediation, evidence should show that concentrations of hazardous constituents are at acceptable levels as determined by regulators. If the site meets the criteria for remediation, then it may be proposed for NFA.

Description of SWMUs Proposed For NFA

1. SWMU 001g
This SWMU consists of the mud pits constructed from the drilling of the H-14 Culebra test well and the P-1 potash exploration well. This SWMU has been determined to be suitable for NFA under criterion 4.
2. SWMU 001h
This SWMU consists of the mud pits constructed from the drilling of the H-15 Culebra test well and the P-2 potash exploration well. This SWMU has been determined to be suitable for NFA under criterion 4.
3. SWMU 001j
This SWMU consists of the mud pit constructed from the drilling of the P-3 potash exploration well. This SWMU has been determined to be suitable for NFA under criterion 3.
4. SWMU 001k
This SWMU consists of the mud pit constructed from the drilling of the P-4 potash exploration well. This SWMU has been determined to be suitable for NFA under criterion 3.
5. SWMU 001l
This SWMU consists of the mud pits constructed from the drilling of the WIPP-12 exploration borehole and the P-5 potash exploration borehole. This SWMU has been determined to be suitable for NFA under criterion 4.
6. SWMU 001m
This SWMU consists of the mud pit constructed from the drilling of the P-6 potash exploration borehole. This SWMU has been determined to be suitable for NFA under criterion 3.
7. SWMU 001n
This SWMU consists of the mud pit constructed from the drilling of the P-15 potash exploration borehole. This SWMU has been determined to be suitable for NFA under criterion 3.
8. SWMU 001o
This SWMU consists of the mud pit constructed from the drilling of the Badger Unit Federal Well #1 wildcat petroleum exploration well which was abandoned in 1974 but is on land under the jurisdiction of the DOE. This SWMU has been determined to be suitable for NFA under criterion 4.
9. SWMU 001p
This SWMU consists of the mud pits constructed from the drilling of the Cotton Baby wildcat petroleum exploration well which was abandoned in 1974 but is on land under the jurisdiction of the DOE. This SWMU has been determined to be suitable for NFA under criterion 4.

10. SWMU 001q
This SWMU consists of the mud pits constructed from the drilling of the DOE-1 well. This SWMU has been determined to be suitable for NFA under criterion 4.
11. SWMU 001s
This SWMU consists of the mud pit constructed from the drilling of the ERDA-9 exploratory borehole. This SWMU has been determined to be suitable for NFA under criterion 3.
12. SWMU 001t
This SWMU consists of the mud pit constructed from the drilling of the IMC-374 exploratory borehole. This SWMU has been determined to be suitable for NFA under criterion 3.
13. SWMU 001x
This SWMU consists of the mud pit constructed from the drilling of the WIPP-13 exploratory borehole. This SWMU has been determined to be suitable for NFA under criterion 4.
14. SWMU 004a
This SWMU consists of an active material storage area used to store new and used parts. This SWMU has been determined to be suitable for NFA under criterion 4.
15. SWMU 007b
This SWMU consists of the southwest evaporation pond area. This SWMU has been determined to be suitable for NFA under criterion 4.

Description of AOCs Proposed For NFA

1. AOC 001r
This AOC consists of the mud pit constructed from the drilling of the D-123 potash exploration borehole. This AOC has been determined to be suitable for NFA under criterion 4.
2. AOC 001u
This AOC consists of the mud pit constructed from the drilling of the IMC-376 potash exploration borehole. This AOC has been determined to be suitable for NFA under criterion 4.
3. AOC 001v
This AOC consists of the mud pit constructed from the drilling of the IMC-456 potash exploration borehole. This AOC has been determined to be suitable for NFA under criterion 4.
4. AOC 001w
This AOC consists of the mud pit constructed from the drilling of the IMC-457 potash exploration borehole. This AOC has been determined to be suitable for NFA under criterion 4.

5. AOC 001ac
This AOC consists of the mud pit constructed from the drilling of the DSP-207 potash exploration borehole. This AOC has been determined to be suitable for NFA under criterion 4.
6. AOC 001ae
This AOC consists of the mud pit constructed from the drilling of the IMC-337 potash exploration borehole. This AOC has been determined to be suitable for NFA under criterion 4.
7. AOC 010b
This AOC consists of the unlined sump in the bottom of the Waste Handling Shaft at the WIPP facility. This AOC has been determined to be suitable for NFA under criterion 3 since it is part of the permitted facility and no release mechanism is available.
8. AOC 010c
This AOC consists of the sump in the bottom of the Exhaust Shaft at the WIPP facility. This AOC has been determined to be suitable for NFA under criterion 3 since it is part of the permitted facility and no release mechanism is available.

Description of New SWMUs Not Requiring an RFI

Since the Permit was issued three additional hazardous waste disposal units have become active. These units are Panels 2, 3 and 4 and will be added to Table 2A as a Class 1 modification.

4. **20.4.1.900 NMAC (incorporating 40 CFR §270.42 (c)(1)(iv)) requires the applicant to provide the applicable information required by 40 CFR §§270.13 through 270.22, 270.62, 270.63 and 270.66.**

The regulatory crosswalk describes those portions of the WIPP HWFP that are affected by this PMR. Where applicable, regulatory citations in this modification reference Title 20, Chapter 4, Part 1, NMAC, revised June 14, 2000, incorporating the CFR, Title 40 (40 CFR Parts 264 and 270). 40 CFR §§270.16 through 270.22, 270.62, 270.63, and 270.66 are not applicable at WIPP. Consequently, they are not listed in the regulatory crosswalk table.

5. **20.4.1.900 NMAC (incorporating 40 CFR §270.11(d)(1) and 40 CFR §270.30(k)) requires that any person signing documents and reports must certify the document in accordance with 20.4.1.900 NMAC.**

The transmittal letter for this PMR contains the signed certification statement in accordance with Permit Condition I.F. of the WIPP HWFP.

 VII.V.5.Task VI:CMS Report and SummaryVII-50

TABLE 1
 RFI/CMS SCHEDULE OF COMPLIANCEVII-53

TABLE 2
~~SWMUS REQUIRING AN RFI~~ ReservedVII-55

TABLE 2A
 SWMUS NOT REQUIRING AN RFIVII-56

TABLE 3
~~AOCs INCLUDED IN THE PERMIT~~ ReservedVII-57

Table 4
SWMUs/AOCs Requiring No Further Action

TABLE 2
SWMUS REQUIRING AN RFI

SWMU NUMBER	NAME
Drilling Mud Pits (13 SWMUs)	
SWMU 001g	H 14/P 1 Mud Pit (s)
SWMU 001h	H 15/P 2 Mud Pit (s)
SWMU 001j	P 3 Mud Pit
SWMU 001k	P 4 Mud Pit
SWMU 001l	WIPP 12/P 5 Drilling Mud Pit(s)
SWMU 001m	P 6 Mud Pit
SWMU 001n	P 15 Mud Pit
SWMU 001o	Badger Unit Drilling Mud Pit(s)
SWMU 001p	Cotton Baby Drilling Mud Pit(s)
SWMU 001q	DOE 1 Drilling Mud Pit(s)
SWMU 001s	ERDA-9 Mud Pit
SWMU 001t	IMC-374 Mud Pit
SWMU 001x	WIPP 13 Drilling Mud Pit(s)
Storage Yard (1 SWMU)	
SWMU 004a	Portacamp Storage Yard, West Side
Evaporation Pond (1 SWMU)	
SWMU 007b	SW Evaporation Pond

TABLE 3
AOCs INCLUDED IN THE PERMIT

AOC NUMBER & (NAME)	RATIONALE FOR INCLUSION
Drilling Mud Pits (6 AOCs)	
001r (D-123)	Presence of hazardous constituents not precluded, release potential to the soil medium is high.
001u (IMC-376)	Presence of hazardous constituents not precluded, release potential to the soil medium is high.
001v (IMC-456)	Presence of hazardous constituents not precluded, release potential to the soil medium is high.
001w (IMC-457)	Presence of hazardous constituents not precluded, release potential to the soil medium is high.
001ac (DSP-207)	Presence of hazardous constituents not precluded, release potential to the soil medium is high.
001ae (IMC-377)	Presence of hazardous constituents not precluded, release potential to the soil medium is high.
Mine Shaft Sumps (2 AOCs)	
010b (Waste Handling Shaft Sump)	Hazardous constituents have been released, the extent of release has not been determined.
010c (Exhaust Shaft Sump)	Hazardous constituents have been released, the extent of release has not been determined.
