Subject: Submittal of Requested Volatile Organic Compound Monitoring Information

Reference: NMED correspondence from James P. Bearzi to David C. Moody and Farok M. Sharif, dated December 4, 2009, subject: Submittal of Corrected Volatile Organic Compound Information WIPP Hazardous Waste Facility Permit EPA I.D. Number NM4890139088

Dear Mr. Bearzi:

Enclosed is volatile organic compound (VOC) monitoring information which is the monthly update to information provided to the New Mexico Environment Department (NMED) in response to your December 4, 2009 letter to the Permittees. This monthly update was requested as Items 3 and 4 in your December 4, 2009 letter and is being provided because the running annual average for carbon tetrachloride remains above 60 parts per billion per volume. The information being provided is described below and will be sent via e-mail and hard copy mailing.

Enclosure A: Electronic spreadsheet of concentration differences at location VOC-A and VOC-B from January 01, 2005 through March 02, 2010. This enclosure is provided via e-mail.

Enclosure B: Chart of concentration differences and running annual average from February 01, 2010 through March 02, 2010.

Enclosure C: A plot of the running annual average concentration for carbon tetrachloride versus date for the preceding 24 months.

Enclosure D: Although not specifically requested by Items 3 or 4, we have also included, for each exceedance reported during the previous month under Permit Condition IV.F.2.c, copies of sample data sheets for the sample collection event at Station VOC-A, meteorological data summary sheets and air conversion log sheets that are used for normalizing the laboratory data. Also provided are updated plots associated with Item 1 in your letter.

If you have any concerns, please contact George T. Basabilvazo at (575) 234-7488.

Sincerely,

A handwritten signature in black ink, appearing to read "David C. Moody".

David C. Moody  
Manager

Enclosure(s)

Mr. James Bearzi
