Title of Calculation:

Potentiometric Surface, Adjusted to Equivalent Freshwater Heads, of the Culebra Dolomite Member of the Rustler Formation near the WIPP Site, March-April 2004 in support of Task 6 of AP-114.

1. Planning Document:

AP-114: Analysis Plan for Evaluation and Recalibration of Culebra Transmissivity Fields, ERMS #537208

2. Description of Calculation Process:

A. The available freshwater head data for WIPP wells completed in the Culebra Dolomite Member of the Rustler Formation to be used in the Sitewide MODFLOW model of the Culebra Dolomite at the WIPP for March and April 2004 were calculated in CUL2004, a spreadsheet created in Excel. The CUL2004 spreadsheet includes the supporting data and calculations utilized in the development of freshwater heads to create the March-April 2004 Culebra potentiometric surface map. The CUL2004FORM spreadsheet includes the formulas contained in the CUL2004 spreadsheet cells. Each column in the CUL2004 and CUL2004FORM spreadsheets and its contents are described below:

- A – Well ID – Well name
- B – State X (Easting) – State Plane location coordinate provided in Gonzales, SAND88-1065
- C – State Y (Northing) – State Plane location coordinate provided in Gonzales, SAND88-1065
- D – Site X – calculated using State Plane X (Column B - 611,500 = Site X)
- E – Site Y – calculated using State Plane Y (Column C - 424,500 = Site Y)
- F – Monument/Ground Surface Elevation (ft AMSL) – provided in Gonzales (SAND88-1065) and/or individual SAND reports (listed in the reference section)
- G – Top of Casing Elevation (ft AMSL) – provided in Gonzales (SAND88-1065) and/or individual SAND reports (listed in the reference section)
- H – Adjustment for Depth from KB to GS (ft AMSL) – adjustment from kelly bushing reference point to ground surface, provided in individual SAND reports (listed in the reference section)
- I – Adjusted March 2004 Depth to Water (ft BTOC) (SNL) – depth to water level measurement collected by SNL
- J – March 2004 Water Level Elevation (ft AMSL) (SNL) – top of casing elevation minus depth to water level measurement (Column G - Column I)
- K – Adjusted March 2004 Depth to Water (ft BTOC) (WRES) – depth to water level measurement collected by WRES
- L – March 2004 Water Level Elevation (ft AMSL) (WRES) – top of casing elevation minus depth to water level measurement (Column G – Column K)
- M – Adjusted April 2004 Depth to Water (ft BTOC) (SNL) – depth to water level measurement collected by SNL
- N – April 2004 Water Level Elevation (ft AMSL) (SNL) – top of casing elevation minus depth to water level measurement (Column G – Column M)
- O – Adjusted April 2004 Depth to Water (ft BTOC) (WRES) – depth to water level measurement collected by WRES

- P – April 2004 Water Level Elevation (ft AMSL) (WRES) – top of casing elevation minus depth to water level measurement (Column G – Column O)
 - Q – Depth to Middle/Center of Culebra (ft BGS) – provided in individual SAND reports (top of Culebra – (top of Culebra-bottom of Culebra)/2) (listed in the reference section)
 - R – Source of Depth to Culebra Center – reference information for depth to center of culebra values
 - S – Center of Culebra Elevation (ft AMSL) – monument/ground surface elevation minus the depth to Culebra (Column F – Column Q)
 - T – March 2004 Head (ft BTOC) (SNL) – March 2004 SNL water level elevation minus center of Culebra elevation (Column J – Column S)
 - U – March 2004 Head (ft BTOC) (WRES) – March 2004 WRES water level elevation minus center of Culebra elevation (Column L – Column S)
 - V – April 2004 Head (ft BTOC) (SNL) – April 2004 SNL water level elevation minus center of Culebra elevation (Column N – Column S)
 - W – April 2004 Head (ft BTOC) (WRES) – April 2004 WRES water level elevation minus center of Culebra elevation (Column P – Column S)
 - X – Density Measurement Date/Source – reference for the time period and source of the surveyed density measurement, specific gravity, or calculated density value (listed in the reference section)
 - Y – Density Measurement Result (g/cc) – pressure density survey, calculated density, or specific gravity measurement value used to calculate the freshwater head for each well
 - Z – March 2004 Freshwater Head (ft AMSL) (SNL) – SNL March 2004 head multiplied by the density measurement plus the center of Culebra elevation ((Column T*Column Y)+Column S)
 - AA – March 2004 Freshwater Head (ft AMSL) (WRES) – WRES March 2004 head multiplied by the density measurement plus the center of Culebra elevation ((Column U*Column Y)+Column S)
 - AB – April 2004 Freshwater Head (ft AMSL) (SNL) – SNL April 2004 head multiplied by the density measurement plus the center of Culebra elevation ((Column V*Column Y)+Column S)
 - AC – April 2004 Freshwater Head (ft AMSL) (WRES) – WRES April 2004 head multiplied by the density measurement plus the center of Culebra elevation ((Column W*Column Y)+Column S)
 - AD – Freshwater Head to be Used for Model (ft AMSL) – the freshwater head value used for the potentiometric surface map (Column Z, AA, AB, or AC) (Note: The freshwater head values from columns AC, AA, and AB, respectively, were used in order based on availability. Data in column Z were not used for the potentiometric surface map, and were only included for data comparison purposes.)
- B. A potentiometric surface map depicting the freshwater heads (ft AMSL) was prepared utilizing the data spreadsheet referenced in item A. The potentiometric surface map contours were developed using the software program Surfer, version 8.0. The parameters used in the Surfer program are as follows:
- Gridding method – Kriging

- Base map – WIPP Site Boundary
- Smoothing contours – high
- Contour interval – 5 feet

3. Identification/Listing of Input, Input sources, and Output:

- Excel spreadsheet including the data – CUL2004.xls (printed copy attached)
- Excel spreadsheet including the data as formulas – CUL2004FORM worksheet in CUL2004.xls (printed copy attached)
- Contour maps – CUL2004.srf (printed copy attached)
- Supporting Surfer files – CUL2004.grd (electronic copy provided on attached CD)

4. Data Qualification for Compliance Decision Analysis:

Data sources provided below in Section 7.0, References

5. Software Used:

Microsoft Office Excel 2003 and Surfer 8.0 run on Dell OPTIPLEX GX280, Intel Pentium 4 processor under Microsoft Windows XP

6. Reviews:

Technical: Mike Hillesheim, 10/3/05

QA: Steve Davis, 10/3/05
