subject: Distribution for Non-Salado Parameter for SECOFL2D: Climate Index

parameter description:	Climate Index
idpram:	CLIMTIDX
idmtrl:	GLOBAL
id#:	223

The constructed distribution (subjective) is as follows: the probability density is 3.0 in the interval from 1.0 to 1.25 and the probability density is 0.333 in the interval from 1.5 to 2.25.

The rationale for this distribution and supporting information is contained in the records package: Non-salado Parameters Required for SECOFL2D: Climate Index, SWCF package number 36425. This package will be placed in the records center at a later date.
