Summary	25
Reports Referenced in and Provided with this Report	

Introduction

As part of continuing compliance, the U.S. Environmental Protection Agency (EPA) requires the U.S. Department of Energy (DOE) to provide any change in information since the most recent compliance application. This requirement is identified in Title 40 Code of Federal Regulations (CFR), Section 194.4(b)(4), which states:

"No later than six months after the administrator issues a certification, and at least annually thereafter, the Department shall report to the Administrator, in writing, any changes in conditions or activities pertaining to the disposal system that were not required to be reported by paragraph (b)(3) of this section and that differ from information contained in the most recent compliance application."

In meeting the requirement, the DOE provides an annual report of all changes applicable under the above requirement each November. This annual report informs the EPA of changes to information in the most recent compliance application, or for this report the 1996 Compliance Certification Application (CCA). Significant planned changes must be reported to the EPA prior to implementation by the DOE. In addition, Title 40 CFR, Section 194.4(b)(3) requires that significant unplanned changes be reported to the EPA within 24 hours or ten days, depending on the severity of the activity or condition. To date, there have been no significant unplanned changes to the certification basis. Planned changes have been submitted on an individual basis. All other changes are reported annually.

The period covered by this Annual Change Report includes changes that occurred between July 1, 2003, and June 30, 2004.

Changes in activities or conditions are reviewed to determine if 40 CFR Section 194.4(b)(3) reporting is necessary. As indicated above, no significant unplanned changes were identified for the time period covered by this report. The enclosed tables list those items identified for reporting under 40 CFR Section 194.4(b)(4). The majority of the changes described in this report are associated with modifications to written plans and procedures for WIPP operations.

This report captures the summary of each change within four tables:

- "Table 1: Changes in WIPP Conditions or Activities Reportable under Title 40 CFR Section 194.4(b)(4)"
- 2. "Table 2: Procedure Revision Table" documents changes to relevant plans and procedures during the reporting period
- "Table 3: Waste Emplacement Summary Report" documents the TRU waste inventory for the waste parameters identified in Table 4-10 of the CCA. The summary provides the total emplaced inventory in the repository as of June 30, 2004 and the inventory that was emplaced during the reporting period (July 1, 2003 to June 30, 2004)
- 4. "Table 4: SNL (Sandia National Laboratories) Software and Hardware Changes" documents the changes to relevant codes, software and hardware that have occurred during the reporting period

In accordance with the EPA's requests and feedback over the past six years, this annual change report incorporates many of the suggestions and guidance for capturing the appropriate level of detail and the layout of information with respect to the WIPP certification criteria.

Additional guidance from EPA for this report is included in the letters approving previous annual change reports.

The letter approving the 1999 Annual Change Report (Docket A-98-49, II B-3, Item 11) provides the following guidance:

• "We appreciate your advance notice of the planned changes under 40 CFR Section 194.4(b)(4) that are currently being considered and may be implemented in the near future."

The letter approving the 2000 Annual Change Report (Docket A-98-49, II B-3, Item 26) provides the following guidance:

 "We were pleased that you reported changes that we reviewed and approved during the reporting year, specifically, the elimination of magnesium oxide minisacks and the raising of the repository horizon. This type of reporting is consistent with our December 2000 recertification guidance and should be continued."

The letter approving the 2001 Annual Change Report (Docket A-98-49, II B-3, Item 32) provides the following guidance:

- "CBFO to provide details related to the quantities of all radionuclides and other limited components (that is, those waste components the emplacement of which in the repository is specifically limited by the certification) actually disposed of at the WIPP." Because the list of trace radionuclides has grown so long, DOE is providing only the information for the ten radionuclides included in Table 4-10 of the CCA.
- "List only approvals for the purpose of expanding CBFO's certification of transuranic waste sites to include new equipment, processes, or waste streams. You do not need to list routine quality assurance inspections that do not result in an expansion of CBFO Certification."
- "Send future change reports in PDF format (Adobe files) and one paper copy, so that we can easily include them in our public dockets."

This annual change report has followed the above recommendations for reporting and transmitting the documents. It does not include all administrative changes to procedures. Examples of administrative changes to procedures that were not included are editorial changes, reformatting, correcting the title of references, correcting inconsistency within a procedure, and other changes that do not change the substance or intent of the document.

Also requested was the identification of any references previously entered into the EPA Docket system. This change is visible within the information in Table 1. Applicable references identify the EPA Docket Item Number for the specific information and add a general sentence identifying the change.

Table 1: Changes in WIPP Conditions or Activities Reportable under Title 40 CFR Section 194.4(b)(4)

July 1, 2003 through June 30, 2004

Table 1: Changes in WIPP Conditions or Activities Reportable under Title 40 CFR Section 194.4(b)(4)

July 1, 2003 through June 30, 2004

Regulatory Requirements	Implementing Document or Activity that Changed	Description of the Change and DOE Assessment of the Impact of the Change
194.14(b) Design of the disposal system	Status of experiments in the WIPP underground	SEGA and MEGA A modular building for housing the SEGA and MEGA experiment was assembled in the Room Q Alcove. Collaborating scientists have visited the project and are preparing the Building for installation of equipment. A trial run for one to two weeks will be conducted in 2004. Actual operation of the experiment is projected to start in the spring of 2005. EXO
		EPA approved Phase I of EXO on February 4, 2004. Preparations continue off-site with no physical activity on-site to date.
194.14(b) Design of the disposal system	Table 2: Procedure Revision Table	The changes to Sandia National Laboratories' (SNL) program documents listed in Table 2 were minor changes and improvements to the program during this reporting period. The changes to the WIPP Waste Information System (WWIS) program documents listed in Table 2 were minor changes and improvements to the WWIS Program during this reporting period. The changes to WIPP Washington TRU Solutions (WTS) plans and procedures listed in Table 2 were minor changes and improvements to the program during this reporting period.
194.15 (a) Content of compliance re- certification application	Documentation of continued compliance pursuant to section 8(f) of the WIPP Land Withdrawal Act	The Compliance Recertification Application (CRA) and appropriate references were submitted in hard copy and on compact disk to the EPA on March 26, 2004. [Docket A-98-49, II-B4]

Table 1: Changes in WIPP Conditions or Activities Reportable under Title 40 CFR Section 194.4(b)(4)

July 1, 2003 through June 30, 2004

Regulatory Requirements	Implementing Document or Activity that Changed	Description of the Change and DOE Assessment of the Impact of the Change
194.21 Inspections	Inspection of Washington TRU Solutions (WTS) Quality Assurance Program	The EPA conducted an audit from August 5-6, 2003, of the Washington TRU Solutions Quality Assurance (QA) program. Letter dated September 11, 2003. [Docket A-98-49, II-A1-50]
194.21 Inspections	Inspection of WIPP Waste Information System	EPA inspection number EPA-CBFO-WWIS-01.04-24 was conducted January 13-15, 2004. Letter dated March 4, 2004. [Docket A-98-49, II-A4-39]
194.21 Inspections	Inspection of Subpart A, waste emplacement and parameter monitoring at WIPP	EPA inspection for EPA-WIPP-6.03-17a (Subpart A), EPA-WIPP-6.03-17b (waste emplacement), and EPA-WIPP-6.03-17c (parameter monitoring). These inspections were conducted on June 17-18, 2003. Letter dated 10/22/2003. [Docket A-98-49, II-B3-53] EPA inspection for EPA-WIPP-6.04-28a (Subpart A), EPA-WIPP-6.04-28b (waste emplacement), and EPA-WIPP-6.04-28c (parameter monitoring). These inspections were performed the week of June 28, 2004.
194.21 Inspections	Audit of the Quality Assurance Programs at CBFO, CCP, and SNL	EPA conducted an audit December 2-4, 2003 of the Quality Assurance (QA) programs of Carlsbad Field Office (CBFO), the Central Characterization Project (CCP), and SNL. Letter dated March 9, 2004. [Docket A-98-49, II-A1-57]
194.21 Inspections	Audit of the SNL Quality Assurance Program	EPA conducted a follow-up audit during May 28-29, 2003, of SNL's QA program and found that two previous issues are in conformance with EPA requirements. Letter dated August 23, 2003. [Docket A-98-49, II-A1-49] EPA audited the SNL QA program on February 24-26, 2004. Letter dated April 19, 2004. [Docket A-98-49, II-A1-59]
194.22(a) Quality assurance	WWIS computer hardware changes	On June 15, 2004, the WWIS database was moved from DEC Alpha computers to Sun Solaris systems to improve reliability.

Table 1: Changes in WIPP Conditions or Activities Reportable under Title 40 CFR Section 194.4(b)(4)

July 1, 2003 through June 30, 2004

Regulatory Requirements	Implementing Document or Activity that Changed	Description of the Change and DOE Assessment of the Impact of the Change
194.22(a) Quality assurance	Waste Generator Site - Hanford	EPA audit of the Hanford Site's QA Program conducted June 17-19, 2003, determined that "TRU wastes that were characterized after January 1, 2003, shall not be shipped to the WIPP until EPA verifies corrective actions at the Hanford Site." Letter dated July 21, 2003. [Docket A-98-49, II-A1-46] EPA conducted a follow-up audit of the Hanford Site's QA program from July 29-30, 2003 that found that Hanford's management had corrected the deficiency found in the previous audit. "Transuranic (TRU) waste that was characterized before February 1, 2003, may be disposed at the WIPP without additional approvals by the EPA. TRU waste characterized during the period between February 1, 2003, and July 31, 2003, using EPA approved waste characterization (WC) processes may be shipped to WIPP only after EPA is notified and approves shipmentWaste characterized beginning August 1, 2003, may be disposed at WIPP without additional approvals by EPA." Letter dated September 12, 2003. [Docket A-98-49, II-A1-51] EPA conducted an audit during September 9-11, 2003 of the QA program of CCP. Letter dated March 9, 2004. [Docket A-98-49, II-A1-55] EPA conducted a second follow-up audit during September 9-11, 2003: "EPAhas determined that Hanford may ship TRU waste characterized between February 1, 2003, and July 31, 2003, without any further notification or approval from EPA." Letter dated March 9, 2004. [Docket A-98-49, II-A1-58]

Table 1: Changes in WIPP Conditions or Activities Reportable under Title 40 CFR Section 194.4(b)(4)

July 1, 2003 through June 30, 2004

Regulatory Requirements	Implementing Document or Activity that Changed	Description of the Change and DOE Assessment of the Impact of the Change
194.22(a) Quality assurance	Waste Generator Site - Idaho National Engineering and Environmental Laboratory (INEEL)	EPA conducted an audit from August 19-21, 2003, of the quality assurance program of the Advanced Mixed Waste Treatment Project (AMWTP) at INEEL. EPA conducted another audit from October 15-16, 2003, to verify completion of corrective actions and to expand the size of the audit sample. Based on the results of the follow-up audit, EPA will make a final determination regarding full compliance in that inspection report. Letter dated January 30, 2004. [Docket A-98-49, II-A1-53]
		EPA conducted the follow-up audit of the quality assurance (QA) program of AMWTP at INEEL and approved the QA program. Letter dated March 9, 2004 [Docket A-98-49, II-A1-56]
194.23 Models and computer codes	Table 4: Performance Assessment (PA) Software and Hardware Changes	The changes to PA software and hardware have been compiled and are located in Table 4 and were minor changes and improvements to the program during this reporting period.
194.24(b) Waste characterization	AMWTF compressed (super-compacted) waste	On March 26, 2004, EPA approved disposal of compressed (super-compacted) waste at WIPP with the requirement to place additional magnesium oxide (MgO) with the compressed waste to maintain a 1.67 safety factor. [Docket A-98-49 II-B3-68]
194.24(c) Waste characterization	CCA Appendix WAP- Waste Analysis Plan	The Waste Analysis Plan (WAP) specifies acceptable sampling and analysis techniques and establishes data quality objectives for characterization of CH TRU mixed waste.
		On March 15, 2004, NMED approved a Class 2 permit modification to allow receipt of Los Alamos National Laboratory (LANL) Sealed Sources without headspace gas sampling analysis when additional acceptable knowledge documentation requirements necessary to identify hazardous constituents are present.
		On May 7, 2004, NMED approved a Class 2 permit modification to allow packaging-specific Drum Age Criteria for New Approved Waste Containers without rigid polyliners.

Table 1: Changes in WIPP Conditions or Activities Reportable under Title 40 CFR Section 194.4(b)(4)

July 1, 2003 through June 30, 2004

Regulatory Requirements	Implementing Document or Activity that Changed	Description of the Change and DOE Assessment of the Impact of the Change
194.24(c) Waste characterization	CH-WAC, Contact Handled Waste Acceptance Criteria	The Contact-Handled Waste Acceptance Criteria (CH-WAC) summarizes the waste acceptance criteria applicable to the transportation, storage, and disposal of transuranic (CH-TRU) waste at WIPP. Changes in the CH-WAC during the reporting period were as follows: On March 1, 2004 DOE completed a revision of the CH-WAC (DOE/WIPP-02-3122 Revision 1) that authorizes the use of the HalfPACT shipping package, changes the ²³⁹ Pu fissile gram equivalent limits for shipping, and adds text to Appendix A for consistency with regard to document review, approval, and implementation.
194.24(c) Waste characterization and Appendix A to Part 194, conditions 2 and 3	Waste Generator Site Certification Argonne National Laboratory-East (ANL-E)	EPA inspection number EPA-ANL-E-CCP-11-03.24. "The ANL-E is approved to dispose at the WIPP the contact-handled transuranic solid waste (S3000) characterized by CCP. "dated January 5, 2004 [Docket A-98-49, II-A4-37] CBFO memorandum, "Expansion of Characterization and Certification Authority for Central Characterization Project at Argonne National Laboratory – East to Include Homogeneous Solids (S3000)," dated June 4, 2004.

Table 1: Changes in WIPP Conditions or Activities Reportable under Title 40 CFR Section 194.4(b)(4)

July 1, 2003 through June 30, 2004

Regulatory Requirements	Implementing Document or Activity that Changed	Description of the Change and DOE Assessment of the Impact of the Change
194.24(c) Waste characterization and Appendix A to Part 194, conditions 2 and 3	Waste Generator Site - Hanford	EPA inspection number EPA-Hanford-06-03.8 and 24 approved waste characterization activities at Hanford. "The DOE is approved to dispose at the WIPP TRU debris waste characterized at Hanford's Waste Receiving and Processing Plant and Plutonium Finishing Plant using the approved systems and processes in the accompanying report." Letter dated August 7, 2003. [Docket A-98-49, II-A4-32]
		EPA conducted a follow-up audit on September 10, 2003 (Inspection EPA-Hanford-06-03.24) to evaluate the additional calorimeters. "We approve these six calorimeters" Letter dated October 23, 2003. [Docket A-98-49, II-A4-33]
		CBFO memorandum, "Annual Re-Evaluation of Hanford Site TRU Waste Program Compliance and Expansion to Include New Nondestructive Assay Systems," dated December 9, 2003.
		EPA inspection number EPA-Hanford-CCP-09.03-8 was conducted September 8-12, 2003. Letter dated February 23, 2004. [Docket A-98-49, II-A4-38]
		"With this letter, we confirm that our previous approval of calorimeters at Hanford for waste characterization can be extended to the use of the aforementioned calorimeters using the methods detailed" Letter dated March 26, 2004. [Docket A-98-49, II-A4-41]

July 1, 2003 through June 30, 2004

Regulatory Requirements	Implementing Document or Activity that Changed	Description of the Change and DOE Assessment of the Impact of the Change
194.24(c) Waste characterization and Appendix A to Part 194, conditions 2 and 3	Waste Generator Site - INEEL	CBFO memorandum, "Certification of INEEL TWCP." Based on the results of audit A-03-15, the CBFO is granting INEEL TRU Waste Characterization Program (TWCP) authority for characterization and data generation level review, validation, and verification of data for S5000 and S3000 Summary Categories using the listed characterization methods. Letter dated November 25, 2003. EPA inspections EPA-INEEL-AMWTP-8-03.08 and EPA-INEEL-AMWTP-10-03.24 of the AMWTP determined that the use of the non-destructive assay (NDA) systems and processes included in the inspection were adequate for TRU solid waste with measured TRU activity above the lower detection limits. Letter dated January 30, 2004. [Docket A-98-49, II-A4-36] EPA letter approved retrievably-stored, CH solid waste characterized using the approved systems and processes of the AMWTP for disposal at WIPP. Letter dated March 8, 2004. CBFO memorandum, "Authority Granted to INEEL AMWTP for Characterization and certification of Contact Handled Homogeneous Solids Transuranic Waste." Based on the results of Audit A-03-05, the CBFO is granting authority for characterization, certification and transportation of homogenous solids waste (S3000). Letter dated March 9, 2004.

Table 1: Changes in WIPP Conditions or Activities Reportable under Title 40 CFR Section 194.4(b)(4)

July 1, 2003 through June 30, 2004

Regulatory Requirements	Implementing Document or Activity that Changed	Description of the Change and DOE Assessment of the Impact of the Change
194.24(c) Waste characterization and Appendix A to Part 194, conditions 2 and 3	Waste Generator Site - Rocky Flats Environmental Technology Site	CBFO memorandum, "Annual Re-Certification of Rocky Flats Environmental Technology TRU Waste Program and Addition of RTR for Lead-Lined Drums and a Third Headspace Gas Unit," dated September 19, 2003. EPA inspection number EPA-RFETS-7-03.08 approved applicable waste characterization activities at RFETS as required under Condition 3 of our certification of WIPP. Letter dated November 21, 2003. [Docket A-98-49, II-A4-34] CBFO memorandum, "Expansion of RFETS' TRU Waste Program Certification Authority to include New Solids Sampling Processes and New NDA Systems, " dated December 30, 2003.
194.24(c) Waste characterization and Appendix A to Part 194, conditions 2 and 3	Waste Generator Site - Savannah River Site	EPA inspection number EPA_SRS-CCP-10-03.24 determined that the previous approval of the mobile IPAN system (EPA Inspection EPA-CCP-10.01-8) as limited by our August 8, 2003, letter still applies. Letter dated March 29, 2004. [Docket A-98-49, II A4-40] CBFO memorandum, "Annual Re-Evaluation of CCP TRU Waste Program at Savannah River Site and Expansion to include the IQ3 Nondestructive Assay System," dated August 8, 2003.
194.24(c) Waste characterization	RH TRU Waste Characterization Program Implementation Plan and RH TRU Waste Characterization Plan	On March 26, 2004, EPA approved the RH TRU Waste Characterization Program Implementation Plan and RH TRU Waste Characterization Plan. This decision does not authorize any site to begin RH waste characterization or shipment to WIPP.

Table 1: Changes in WIPP Conditions or Activities Reportable under Title 40 CFR Section 194.4(b)(4)

July 1, 2003 through June 30, 2004

Regulatory Requirements	Implementing Document or Activity that Changed	Description of the Change and DOE Assessment of the Impact of the Change
194.27 Peer review	CBFO MP 10.5 Peer Review	An independent Spallings Peer Review was held the week of July 7, 2003 in Albuquerque, NM. The Peer Review Report was completed in October 2003. The panel concluded: • The new Spallings conceptual model appears generally sound in its structure and reasonableness. • The proposed implementation of the new Spallings model appears reasonable. • Output from sensitivity analysis indicates acceptable results.
194.27 Peer review	CBFO MP 10.5 Peer Review	On November 12, 2003, CBFO issued Interim Change Notice #1, Management Procedure 10.5, Revision 5, Peer Review: Change paragraph 7.1 of attachment one to read: "The CBFO QA Manager should conduct assessments of the peer review process to ensure that all aspects of the peer review process conform to this procedure."
194.32(c) Scope of performance assessments, 194.33 Consideration of drilling events in performance assessments	SNL Annual Compliance Monitoring Parameter Assessment for 2003	SNL issued the SNL Annual Compliance Monitoring Parameter Assessment for 2003 in June, 2004. A copy of this report is included with this report.
194.42 Monitoring	Table 3: Waste Emplacement Summary Report	A summary of the TRU waste inventory that has been emplaced in the repository is presented in Table 3 of this report. The inventory includes volumes and radiological activity (curie content) of waste that has been emplaced in the repository as of June 30, 2004.
194.42 Monitoring	Delaware Basin Monitoring Annual Report DOE/WIPP-99-2308	DOE/WIPP-99-2308, Rev. 4, issued in September 2003. The time period for which this report is developed is September 01, 2002 through August 31, 2003. A copy of this report is included with this report.

194.42 Monitoring	WIPP Site Environmental Report Calendar Year 2002 DOE/WIPP 03-2225	DOE/WIPP 03-2225, WIPP Site Environmental Report for Calendar Year 2002, September 2003. This report provides information and data on groundwater and meteorological monitoring. A copy of this report is included with this report.
194.42 Monitoring	WIPP Subsidence Monument Leveling Survey DOE/WIPP-04-2293	DOE/WIPP-04-2293, WIPP Subsidence Monument Leveling Survey, was issued in October 2003. Subsidence information obtained from surveys conducted during September 2003, is included in the report. A copy of this report is included with this report.
194.42 Monitoring	Geotechnical Analysis Report for July 2002 – June 2003 DOE/WIPP 04-3177	DOE WIPP 04-3177, Geotechnical Analysis Report for July 2002 – June 2003, was issued in March 2004. A copy of this report is included with this report.

Table 2: Procedure Revision Table
July 1, 2003 through June 30, 2004

Table 2: Procedure Revision Table

Procedure	Rev. & Effective Date	Description of Changes from 07/01/03 through 6/30/04
DOE/CBFO 97-2273 WWIS User's Guide	Rev. 7, 06/01/04	The change to the document included a minor update to include a diagram that depicts the design of WWIS hardware.
	Rev. 6, 05/10/04	The change to the document included a new revision to address WWIS software upgrade to
	Rev. 5, 12/29/03	version 4.16. Primarily minor editorial updates and clarifications.
		The change to the document included a complete rewrite that included adding new sections to summarize input or assay methods, characterization methods, automated container data check/functionality, overpacking, reporting of headspace gas analytical data, and a discussion about beryllium in quantities > 1 percent by weight and associated transportation limits.
Sandia National Laboratories (SNL) NP 2-1, Qualification and Training	Rev. 7, 06/03/04	This is a complete revision of NP 2-1. The layout has been rearranged into the following major sections: Initial Qualification and Training of Individuals, Updated Qualification and Training of Individuals, Annual WIPP QA Training, and New or Revised Procedure Training. A procedure matrix has been added that identifies required procedures for individual job categories. Form NP 2-1-1, Qualification and Training Form, has been updated to reflect the procedures matrix. A "self study" option is now included on Form NP 2-1-2, Training Record. All flow charts have been updated.
Sandia National Laboratories (SNL) NP 4-1, Procurement	Rev. 7, 06/24/04	Procedure NP 4-1 was revised to address conditions identified in a Corrective Action Request (CAR) (CBFO CAR 04-010) from a CBFO audit and a CAR (IS-04-06-CAR-01) from an internal surveillance. Procedure NP 4-1 has been revised to clarify the procurement and receipt inspection processes. NP 4-1 has also been changed to remove the Quality Grade levels.
	Rev. 6, 07/18/03	NP 4-1 was revised to delineate the roles and responsibilities of the Procurement function and Document Control identified as a problem in CAR W-02-10.
Sandia National Laboratories (SNL) NP 12-1, Control of Measuring and Test Equipment	Rev. 4, 07/17/03	NP 12-1 was revised to comply with CBFO QAPD Rev. 5. Removed requirements that calibration services conform to ANSI/NCSL Z540-1.

Table 2: Procedure Revision Table

Procedure	Rev. & Effective Date	Description of Changes from 07/01/03 through 6/30/04
Sandia National Laboratories (SNL) NP 16-1, Corrective Action	Rev. 4, 09/29/03	NP 16-1 description of changes is as follows: Added text on performing a partial verification of corrective action; consistent use of Corrected During the Audit/Surveillance (CDA/CDS) when identifying trending of CARs; required level of review for CARs and CAPs. This revision addressed the use of the partial verification process.
Sandia National Laboratories (SNL) NP 17-1, Records	Rev. 5, 05/27/04	Editorial changes and clarifications made.
THE TY I, NOOTED	Rev. 4, 07/14/03	Section 2.3, QA review of all submittals was added and editorial changes were made. Changes were made to the Records Submittal form NP 17-1-2 (Appendix B) to require the signature of QA reviewer.
Sandia National Laboratories (SNL) NP 18-1, Audits and Surveillances	Rev. 5, 09/30/03	NP 18-1 was revised to address conditions identified in CAR W-03-09. The reason for this revision is to add and define terms Corrected During the Audit/Surveillance (CDA/CDS), Observations and Recommendations to provide more consistency between the SNL assessment program and the CBFO program.
Sandia National Laboratories (SNL) NP 20-2, Scientific Notebooks	Rev. 4, 05/06/04	Revision to procedure was to provide clarification and to address the scientific notebook CAR W-03-12, and in response to the scientific notebook internal surveillance IS 04-03.
	Rev. 3, 07/17/03	Removed a sentence that refers to a PI defining the content of a notebook entry in response to Observation #2, Audit IA 02-01.
Sandia National Laboratories (SNL) SP 1-1, QA Grading	Rev. 5, 06/24/04	Procedure SP 1-1 was revised to address conditions identified in a CAR (CBFO CAR 04-010) from a CBFO audit and a CAR (IS-04-06-CAR-01) from an internal surveillance. Procedure SP 1-1 has been revised to clarify the grading process by better defining Quality Grade levels QL-1 and QL-2, and adding more specific criteria for QA Grading levels.
	Rev. 4, 07/18/03	Procedure SP 1-1 was revised to add "Grading" to the title of Form SP 1-1-1 and make the procedure consistent with NP 4-1, Rev. 6.

Table 2: Procedure Revision Table

Procedure	Rev. & Effective Date	Description of Changes from 07/01/03 through 6/30/04
Sandia National Laboratories (SNL) SP 6-1, Publicly Released Documents	Rev. 4, 06/14/04 Rev. 3, 09/17/03	Procedure SP 6-1 was revised to incorporate the new SNL electronic Review and Approval system. The flow chart in Appendix A was updated to reflect the new electronic process. The Designated Unclassified Subject Area (DUSA) program was incorporated into the procedure. A DUSA delegate can sign off in Section 4 of the Review and Approval form. The requirement for an approval letter from CBFO for the sensitivity review was modified to allow email notification of approval. Sections 2.11 "References" and 2.12 "Forms" were removed to align the procedure with other SPs.
Sandia National Laboratories (SNL) SP 9-6 Baseline Inventory Report (BIR) Change Report Data Collection and Entry	Rev 2. 03/10/03	Procedure SP 9-6 describes the activities performed by LANL and SNL for the development of an update report to the Transuranic Baseline Inventory Report (TWBIR) in the CCA. The work was performed under this procedure and under other applicable SNL QA procedures under a Memorandum of Agreement. This procedure was not reported last year.
Washington TRU Solutions (WTS) 02-EC3506, Environmental Incident Reporting	Rev. 4, 10/02/03	Procedure WP EC3506, Environmental Incident Reporting was revised 10/02/03. The changes were to clarify reporting quantities, to implement changes to receive polychlorinated biphenyl (PCB) contaminated waste, and minor editorial changes.
Washington TRU Solutions (WTS) 02-EM1007, Cation and Anion Analysis	Rev. 1, 09/19/03	Procedure WP 02-EM1007, Cation and Anion Analysis was revised 9/19/03 to define the parameters for the saved analyses and make minor editorial changes. This is part of the groundwater monitoring program.
Washington TRU Solutions (WTS) 02-PC3003, WTS Compliance Certification and PCB Change Screening and Notification of Radionuclide Release or Potential Release	Rev. 3, 09/25.03	Procedure WP 02-PC3003, WTS Compliance Certification and PCB Change Screening and Notification of Radionuclide Release or Potential Release was revised 9/25/03. The changes were to implement changes to receive PCB contaminated waste, update the document list, and minor editorial changes.
Washington TRU Solutions (WTS) 05-WH1011, CH Waste Processing	Rev. 20, 01/26/04	Procedure WP 05-WH1011, CH Waste Processing was revised 01/26/04 to implement changes to receive PCB contaminated waste and HalfPACT package information, clarify stacking heights in the Waste Handling Building and the underground, and make minor editorial changes.

Table 2: Procedure Revision Table

Procedure	Rev. & Effective Date	Description of Changes from 07/01/03 through 6/30/04
Washington TRU Solutions (WTS) 08-NT.01, WIPP Waste Information Data Management Plan	Rev. 10, 12/12/03	The specific changes being implemented by this revision are: provided additional clarification that the operating record is maintained by Site Environmental Compliance; extensive revision to provide additional clarification about functions performed by the WWIS Team; provided additional clarification regarding QA oversight of the WWIS Software QA Program; re-formatted section and provided additional clarifications, process description and details regarding data management for Site Derived Waste.
	Rev. 9, 08/26/03	The specific changes that were implemented by this revision are: the addition of new text that: describes the functions performed by the WWIS System Operator; description of how the change log captures information when container data is placed in a hold status or when container data is reset to Pre-Submittal to Certification; description of the Overpack Container Transportation Certification Document (OPTCD) that can be generated using e-TRAMPAC; describes the interface with Waste Handling procedures and how container data for Site Derived Waste is input to the WWIS by the Data Administrators; description of the fields for "PCB Mass", "PCB Out-of-Service Date" and "PCB checkbox". It also includes a total re-write of the Inventory Module description and Table 5, Data Fields for the Emplace Containers Underground Data Entry Screen.
Washington TRU Solutions (WTS) 08-NT.04 WIPP Waste Information System Configuration Management and Software Quality Assurance Program Assurance	Rev. 6, 03/17/04 Rev. 5, 12/12/03	The specific changes being implemented by this revision are providing additional clarification regarding development of Baseline Change Request (BCR) in the event that the budgets and resources will not be adequate to support development and implementation of a revision(s) to the WWIS client software. The specific changes being implemented by this revision are providing clarifications throughout the document and made several modifications to the WWIS Software Modification Request Sheet, the WWIS Document Evaluation Sheet, and the WWIS Data Change Request Sheet.

Table 2: Procedure Revision Table

Procedure	Rev. & Effective Date	Description of Changes from 07/01/03 through 6/30/04
Washington TRU Solutions (WTS) 08-NT.09 WIPP Waste Information System Security Plan	Rev. 0, 06/21/04	Formerly, security plans for the WWIS were developed, maintained and approved outside of the Quality and Manufacturing Integrated System (QMIS). From a security standpoint, the WWIS is categorized as mission essential and therefore requires an approved security plan. In order to maintain adequate document control, management requested that the Security Plan for the WWIS be available on QMIS.
		The document provides the following information: identification of Information Processed (i.e., what the WWIS does); identification of security personnel; a description of the WWIS and it's use; responsibilities and expected behavior of the users (i.e., a summary of user categories and privileges); application rules(i.e., limitations on changing data, rules for performing searches, disseminating information, and a summary that describes how the software and system hardware are changed), Contingency Plan that summarizes the ability to recover from loss of existing application support with a requirement for annual testing of the contingency plan; and technical security (i.e., use of security products and features, controls for users identification, access controls, data validation controls, auditing, design review and application testing, and software development.
Washington TRU Solutions (WTS) 08-NT3020, TRU Waste Receipt	Rev. 9, 10/15/03	The revisions are to update the procedure to implement changes to receive PCB contaminated waste and minor editorial changes.
Washington TRU Solutions (WTS) 13-1, Washington TRU Solutions LLC Quality Assurance Program	Rev. 24, 08/08/03	The revisions were to reflect CBFO QAPD Revisions 4 and 5.

Table 3: Waste Emplacement Summary Report

July 1, 2003 through June 30, 2004

Table 3: Waste Emplacement Summary Report

Summary of Waste Emplacement Inventory					
	TRU Waste Inventory				
	Reporting Period ¹ Emplaced Container Volume (m ³)		Cumulative Emplaced Container Volume (m³)		
CH TRU	8,6			,646	
	Wa	ste Components	Inventory		
	Reporting Period ¹ Emplaced Mass (kg)	Cumulative Emplaced Mass (kg)	Maximum Emplacement Limiting Value ² (kg)	Percent of Limiting Value ² Emplaced	
Cellulose, Plastic, Rubber Materials ³	550,342	1,850,273	20,000,000	9.25%	
	Reporting Period ¹ Emplaced Mass (kg)	Cumulative Emplaced Mass (kg)	Minimum Emplacement Limiting Value ² (kg)	Percent of Limiting Value ² Emplaced	
Fe-Metals⁴	2,381,666	6,405,350	20,000,000	32.03%	
Non-Fe Metals	54,559	143,144	2,000	7157.20%	
Residual Liquids	Liquid waste is prohibited at WIPP. The total residual liquid in any payload container shall not exceed one percent by volume of that payload container.				

Radiological Activity Inventory (curies)			
Radionuclide	Cumulative Activity in FY 2003 Annual Change Report	Reporting Period Activity	Total Activity as of June 30, 2004
²⁴¹ Am	1.22E+05	1.73E+04	1.40E+05
²³⁸ Pu	6.79E+03	3.68E+03	1.05E+04
²³⁹ Pu	1.63E+05	4.30E+04	2.06E+05
²⁴⁰ Pu	3.69E+04	1.20E+04	4.89E+04
²⁴² Pu	3.66E+00	3.11E+00	6.77E+00
²³³ U	4.26E-01	7.24E-02	4.99E-01
²³⁴ U	2.39E+00	1.34E+00	3.73E+00
²³⁸ U	8.00E+00	6.75E-01	8.67E+00
¹³⁷ Cs	6.16E-01	6.07E-01	1.22E+00
⁹⁰ Sr	7.53E-01	6.33E-01	1.39E+00
Total	3.29E+05	7.60E+04	4.05E+05

- 1. Reporting Period includes emplacement that occurred between 07/01/03 and 06/30/04
- 2. Limiting Value--Values from Docket A-93-02, II-B-2, CARD 24. These values are based on inventory assumptions and are not limited by the Land Withdrawal Act. These values may change as inventory destined for WIPP changes and the PA is updated.
- 3. Cellulose, plastic, rubber materials (CPR) includes container materials and CPR within the waste but does not include slip sheets or shrink wrap.
- 4. Fe-Metals includes both material in the waste and containers in total.

Table 4: Performance Assessment Software and Hardware Changes

July 1, 2003 through June 30, 2004

Table 4: Performance Assessment Software and Hardware Changes

WIPP Use Codes/Software & Code Version	Version Date	Description of Changes from 7/1/03 through 6/30/04	
BRAGFLO Version 5.00	03/23/04 05/03/04	Regression Testing on OpenVMS V7.3-1/Compaq Alpha ES45 and 8400. Added Test Functionality.	
CAMCON_LIB Version 2.20	12/10/03	Regression Testing on OpenVMS V7.3-1/Compaq Alpha Server 8400.	
CAMDAT_LIB Version 1.25	12/10/03	Regression Testing on OpenVMS V7.3-1/Compaq Alpha Server 8400.	
CAMSUPES_LIB Version 2.22	12/10/03	Regression Testing on OpenVMS V7.3-1/Compaq Alpha Server 8400.	
CCDFGF Version 5.00 CCDFGF Version 5.00A CCDFGF Version 5.00A	08/14/03 09/10/03 03/23/04	Revision to CCDFGF code consistent with results of Salado Flow peer review. Corrected record length specification for output files. Regression Testing on OpenVMS V7.3-1/Compaq Alpha ES45 and 8400.	
CUTTINGS_S Version 5.10	10/24/03	Changed to implement DRSPALL results in PA.	
DRSPALL Version 1.00 DRSPALL Version 1.10	10/8/03, 10/6/03 02/18/04 04/26/04 04/26/04 04/26/04	Implementation of new conceptual model for Spallings. Implement Input Parameter Bounds Checking. Regression Testing on OpenVMS V7.3-1/Compaq Alpha ES45 and 8400. Bounds checking changes and cosmetic changes. Regression Testing on OpenVMS V7.3-1/Compaq Alpha ES45 and 8400.	
EPAUNI Version 1.15A	07/8/03 03/22/04	Change definition of IFLAG to allow change in inventory base year. Regression Testing on OpenVMS V7.3-1/Compaq Alpha ES45 and 8400.	
GENII-A Version 2.10	05/05/04	Regression Testing on OpenVMS V7.3-1/Compaq Alpha ES45 and 8400.	
ORIGEN2 Version 2.2	11/4/03	Moved from LANL to SNL on Dell Precision 340, 2.26GHz, 523 Mb RAM.	
PANEL Version 4.02	03/23/04	Regression Testing on OpenVMS V7.3-1/Compaq Alpha ES45 and 8400.	
PLT_LIB Version 2.04	12/9/03	Regression Testing on OpenVMS V7.3-1/Compaq Alpha Server ES40, ES45, and 8400 and corrected postscript and changed logarithmic axis.	

Table 4: Performance Assessment Software and Hardware Changes

WIPP Use Codes/Software & Code Version	Version Date	Description of Changes from 7/1/03 through 6/30/04
PREBRAG Version 7.0	03/23/04	Regression Testing on OpenVMS V7.3-1/Compaq Alpha ES45 and 8400.
PRECCDFGF Version 1.00A	08/6/03 06/10/04	Change to data for Test Case 1 and corrected incorrect write statement. Retired from use.
PRECCDFGF Version 1.00B	09/10/03 03/23/04	Corrected material names and added RECL=1610. Regression Testing on OpenVMS V7.3-1/Compaq Alpha ES45 and 8400.
PRECCDFGF Version 1.00C	10/13/03 06/10/04	Corrected average radionuclide concentrations for Spallings. Retired from use.
PREGENII Version 6.30	05/06/04	Regression Testing on OpenVMS V7.3-1/Compaq Alpha ES45 and 8400.
POSTGENII Version 4.20	05/10/04	Regression Testing on OpenVMS V7.3-1/Compaq Alpha ES45 and 8400.
SANTOS Version 2.1.7	08/25/03	Moved to new platform and revalidated on Compaq Alpha 8400 with Tru64 OSF1V5.1.
SDBREAD_LIB Version 3.11	08/18/03, 12/10/03	Regression Testing on OpenVMS V7.3-1/Compaq Alpha Server ES40, ES45, and 8400.
SECOTP2D Version 1.41A	07/9/03 03/23/04	Change dimension of MAXK for larger grid used in CRA. Regression Testing on OpenVMS V7.3-1/Compaq Alpha ES40 and 8400.
TWBID Version 3.12	08/12/03 11/4/03	Corrected data errors. Moved from LANL to SNL on Dell Precision 340, 2.26GHz, 523 Mb RAM.

Summary

The DOE believes the changes reported in this Annual Change Report do not represent significant changes pertaining to the disposal system.
