GLOSSARY GL-1

ACRONYMS ACRO-1

REGULATORY CROSS REFERENCE TABLES XWALK-1

1.0 INTRODUCTION 1-1

 1.1 Applicable Regulations 1-3

 1.1.1 40 CFR Part 191 1-4

 1.1.2 40 CFR Part 194 1-5

 1.1.3 Other Regulations 1-6

 1.2 Project Background 1-6

 1.3 Site Selection Process 1-12

 1.4 Program for Evaluating Long-Term Performance 1-14

 1.5 Compliance Certification Application Synopsis 1-18

 1.6 Statement for the Purposes of 40 CFR Part 194, Subpart A 1-33

 1.7 Documentation Incorporated by Reference 1-34

REFERENCES 1-35

BIBLIOGRAPHY 1-36

2.0 SITE CHARACTERIZATION 2-1

 2.1 Geology 2-6

 2.1.1 Data Sources 2-9

 2.1.2 Geologic History 2-11

 2.1.3 Stratigraphy and Lithology in the Vicinity of the WIPP Site 2-12

 2.1.4 Physiography and Geomorphology 2-64

 2.1.5 Tectonic Setting and Site Structural Features 2-68

 2.1.6 Nontectonic Processes and Features 2-80

 2.2 Surface Water and Groundwater Hydrology 2-93

 2.2.1 Groundwater Hydrology 2-97

 2.2.2 Surface-Water Hydrology 2-136

 2.3 Resources 2-145

 2.3.1 Extractable Resources 2-146

 2.3.2 Cultural and Economic Resources 2-156

 2.4 Background Environmental Conditions 2-161

 2.4.1 Terrestrial and Aquatic Ecology 2-162

 2.4.2 Water Quality 2-166

 2.4.3 Air Quality 2-170

 2.4.4 Environmental Radioactivity 2-170

3 6-26. Schematic Side View of the Disposal System Associating Performance

4 Assessment Codes with the Components of the Disposal System Each Code

5 Simulates 6-177

6 6-27. Probability of Intrusions in 10,000 Years with Active Institutional Control for

7 100 Years Followed by 600 Years of Passive Institutional Control 6-185

8 6-28. Discretized Locations for Random Intrusion by an Exploratory Borehole 6-187

9 6-29. Levels of Information Available in the TWBID 6-191

10 6-30. Flowchart Showing Integration of TWBID Data in Performance Assessment

11 Calculations 6-193

12 6-31. Cumulative Distribution Function for Waste Stream EPA Units/Volume 6-195

13 6-32. Code Configuration for the Undisturbed Performance Scenario 6-201

14 6-33. Code Configuration for Disturbed Performance Scenarios E1 and E2 6-205

15 6-34. Code Configuration for Disturbed Performance Scenario E1E2 6-207

16 6-35. Distribution of CCDFs for Normalized Radionuclide Releases to the Accessible

17 Environment from the WIPP, Replicate 1 6-217

18 6-36. Distribution of CCDFs for Normalized Radionuclide Releases to the Accessible

19 Environment from the WIPP, Replicate 2 6-219

20 6-37. Distribution of CCDFs for Normalized Radionuclide Releases to the Accessible

21 Environment from the WIPP, Replicate 3 6-221

22 6-38. Mean CCDFs for Normalized Radionuclide Releases to the Accessible

23 Environment 6-223

24 6-39. Confidence Levels for the Mean CCDF 6-225

25 6-40. Summary CCDFs for Replicates 1, 2, and 3 6-227

26 6-41. Mean CCDFs for Specific Release Modes, Replicate 1 6-229

27 7-1. Implementation Timeline 7-3

28 7-2. Grazing Allotments on the WIPP Site as of October 1996 7-9

29 7-3. Area Where Hunting is Permitted Within the WIPP Site Boundary 7-13

30 7-4. Location of Rights-of-Way Within the WIPP Site Boundary as of October 1996 . 7-15

31 7-5. Location of Groundwater Wells Within the WIPP Site Boundary as of

32 October 1996 7-17

33 7-6. Location of Surface Quarries Within the WIPP Site Boundary as of

34 October 1996 7-19

35 7-7. Location of Potash Exploration Holes and Economically Mineable Potash

36 Within the WIPP Site Boundary as of October 1996 7-23

37 7-8. Hydrocarbon Holes Located Within the WIPP Site Boundary as of October 1996 7-25

38 7-9. Planned Repository Footprint 7-29

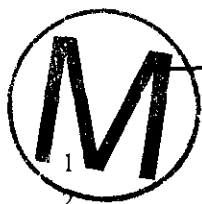

39 7-10. Layout and Instrumentation of Geomechanical Monitoring System as of

40 January 1996 7-55

41 7-11. Location of the New Water Quality Sampling Wells 7-59

42 7-12. Repository Footprint Perimeter Monument Configuration 7-69

43 7-13. Controlled Area Perimeter Monument Configuration 7-71

3 7-14. Small Buried Warning Marker 7-73

4 7-15. Berm Construction 7-75

5 7-16. Passive Institutional Controls Timeline 7-83

6 8-1. Conceptual Transport Pathway 8-5

7 9-1. Cumulative Brine Flow through the Panel Closure between the Intruded Panel

8 and the Rest of the Repository for Permeabilities of 10^{-15} to 10^{-17} m² 9-23

9 9-2. Actinide Transport to the Magenta, E1 Intrusion 9-31

10 9-3. Cumulative Brine Flow through the Panel Closure between the Intruded Panel

11 and the Rest of the Repository 9-41

12 9-4. Cumulative Brine Flow through the Panel Closure between the Intruded Panel

13 and the Rest of the Repository 9-43

14 9-5. Sketch Showing Necessary Flow Path for Castile Brine to Carry Contaminants

15 from Intruded Panel to Surface 9-49

16 9-6. Maximum Liquid/gas Ratio versus Maximum Gas Flow rate 9-61

17 9-7. Multiplier by which Spall Releases Would Be Reduced if Effects of Two-phase

18 Flow on Solids Were Included in Performance Assessment Modeling 9-63

19 9-8. Scatterplot Showing Lack of Correlation Between Brine Flow from the Castile

20 Brine Reservoir and the Sampled Value for Brine Reservoir Volume 9-67

21 9-9. Scatterplot Showing Correlation between Brine Flow from the Castile Brine

22 Reservoir and the Reservoir Pore Compressibility 9-69

23 9-10. Fraction of Initial Iron Remaining in Repository, Undisturbed Performance 9-77

24 9-11. Total Gas Volume Generated by Corrosion of Iron, Undisturbed Performance 9-79

25 9-12. Fraction of Initial Iron Remaining in Intruded Panel, E1 Intrusion at 1,000

26 Years 9-81

27 9-13. Fraction of Initial Iron Remaining in Repository, E1 Intrusion at 1,000 Years 9-83

28 9-14. Volume Averaged Pressure in the Intruded Panel, E1 Intrusion at 1,000 Years 9-85

29 9-15. Cumulative Volume of Gas Generated by Corrosion of Iron, E1 Intrusion at

30 1,000 Years 9-87

31 9-16. Cumulative Gas Flow Up the Borehole at the Top of the DRZ, E1 Intrusion at

32 1,000 Years 9-89

33 9-17. Volume-Averaged Pressure in the Repository, Undisturbed Performance 9-95

34 9-18. Volume of Brine in Anhydrite Interbeds That Has Previously Been in Contact

35 with Waste, Undisturbed Performance 9-97

36 9-19. Scatterplots Showing Relationship of Spalling Releases to Repository Pressure,

37 First Intrusion into the Repository 9-99

38 9-20. Scatterplot Showing Relationship of Direct Brine Releases to Repository

39 Pressure, First Intrusion into the Repository 9-101

40 9-21. Scatterplot Showing Relationship of Total Moles of Gas Generated to Final

41 Repository Pressure (E1 Intrusion at 1,000 years) 9-103

42 9-22. Scatterplot Showing Relationship of Total Moles of Gas Generated to Final

43 Repository Pressure (E2 Intrusion at 1,000 years) 9-105
