I am a full time government employee and a part time student trying to finish a PhD in the evenings. The only task remaining in my degree program is the dissertation. I specifically designed my dissertation so that the survey data would be valuable to information technology (IT) managers of computer applications for use in their software quality management program. The survey is a standard Computer User Satisfaction assessment, similar to the Quality-In-Use portion of ISO-9126, an international standard for the evaluation of software quality. The survey has 22 questions and should take 10 minutes to complete. This request is for an educational and scientific purpose.

I need your assistance to provide me the names of the IT managers of all of the IT projects at the DOE. If there is an existing listing or directory with contact information of IT managers that will be fine if you can email it to me.

I need the "IT Manager Directory" by expedited response because my survey deadline is 26-Feb. My plan to complete the oral defense is 14-May. I need time before the oral defense to analyze the data and write the findings and conclusion.

I am willing to pay up to \$50.00 for the list or directory.

Thanks,
